

Laboratory tables

Need a custom-made laboratory?

INTOS Lab Solutions offers everything you need.

While our catalog of laboratory furniture provides a complete overview of solutions it never fully supports the unique workflow of every laboratory. Therefore, in addition to catalog furniture, INTOS Lab Solutions also produces custom-made solutions. From laboratory tables and sink units to cleanroom furniture and fume hoods, we have it all within our scope of products. To complete your laboratory, we collaborate with trusted partners to offer laboratory equipment such as safety workbenches and safety cabinets, including biosafety cabinets, chemical storage cabinets, and explosion-proof cabinets. This way, we ensure a total solution, allowing laboratory staff to perform their work optimally.

C-, H- and T-frames

With these frames, you create a flexible and versatile system. Each type of frame offers unique benefits:

- ▶ **C-frames:** Allows base cabinets to be moved along the entire length.
- ▶ **H-frames:** Ideal for supporting centrifuges and heavy materials.
- ▶ **T-frames:** Provide free space for easy floor cleaning.

Weighing, centrifuge, and microscope tables

Our specialized tables are designed with a separate frame for optimal stability. They are placed independently within the modular system to prevent vibrations and are available in both sitting and standing heights. The tables can be supplied with a solid core or stone worktop and vibration dampers for precise measurements.

Height-adjustable systems

We also offer height-adjustable systems based on T- and H-frames, which can be operated both electrically and manually. These systems are flexibly deployable, allowing the laboratory to be arranged in a versatile manner. These systems are ergonomically responsible and contribute to a comfortable and healthy working environment.

Plinth-mounted furniture

Our laboratory tables with fixed setups rest on modular base cabinets with plinths and can be freestanding or placed against the wall. With a supporting frame between the cabinets, the original setup can be combined with workstations. This type of furniture can also be adapted into sink units.

Media solutions

Our furniture is suitable for both wall and island setups, with cords, cables, and other media neatly concealed. The tables can be equipped with media bridges, troughs, and columns, which we fully install. This way, all installations, from electricity to gas, are integrated and easily accessible. This approach not only improves the aesthetics and usability of the laboratory but also enhances safety and efficiency, as all critical connections remain easily reachable and neatly stored.

INTOS Lab Solutions

At INTOS Lab Solutions, we take pride in our extensive knowledge and our position as a leading supplier of laboratory furnishings.

We go beyond mere supply – we act as project manager, consultant, sustainable maintenance manager, and main contractor for turnkey solutions. Our services and products are available to a wide range of organizations, from biotech and pharmaceutical companies to educational, healthcare, and high-tech institutions. We understand the specific requirements of each sector and deliver customized solutions that meet high standards. Additionally, we offer excellent service and maintenance through our nationwide operating team.

Our team values a personal and flexible approach tailored to your needs, which uniquely sets us apart.
