

Counter solutions

We offer a wide range of high-quality counters, both in functionality and design. From various check-in desks to immigration desks and everything in between. And in terms of shape; from straight to oval and rotatable. Also consider a hybrid desk, which can serve both as a traditional check-in, but can also be used as a full self-service desk.

Space-saving search cabins

As lack of space at airports is a common problem, fixed visitation booths are often considered a waste of space when not in use. From our solution-oriented mindset, we developed a foldable and thus space-saving visitation booth. It ensures that, when there is no need to search, the space can be used for other purposes.

Terminal fitting-out

INTOS understands that the fitting out of areas within an airport terminal involves meticulous planning and execution to ensure functionality, comfort, and aesthetic appeal. From departure lounges to retail spaces and security areas, all are designed to enhance passenger experience, optimize flow, and reflect the airport's identity while adhering to safety and regulatory standards.

Tailor-made lounge concepts

The fitting out of an airport lounge demands precision and luxury integration, tailored to provide travelers premium comfort and a productive space within the terminal environment. INTOS has the experience to combine elegant furnishings and state-of-the-art amenities, with an interior withstanding long-term intensive use.

Premium temporary sanitary solutions

Plugaloo: A comfortable resting point for passengers with high quality and hygiene. Public facilities that look permanent, yet can be disassembled and moved within 24 hours. Designed for intensive use and cleaning. Sturdy, safe and suitable for large numbers of visitors and executed with smart techniques.

Decades of experience, specialist knowledge and craftsmanship. That's the foundation on which INTOS builds.

Hans Matze
director operations

Full service specialist

INTOS has been working for international airports worldwide since 1991 and acts as a true partner for its clients. We incorporate our knowledge and experience into standard and inventive customized products and services for airports. Ranging from space-saving and flexible counters for check-in, immigration, passport control and boarding to products for airport security and temporary, high-quality toilets. Purely customized, we also fit out shops and complete business class and first class lounges. Thanks to our experience and because we fulfil both the role of furnisher, main contractor and maintenance specialist in airport projects, we oversee these projects completely!

Passenger experience upgrade

Each airport is unique; from its location to surface area, passenger flow size and associated safety requirements.

INTOS specializes in crafting exceptional airport interiors tailored to enhance passenger experience. From high-end business class lounges, to efficient retail lay-outs, our focus is on creating inviting spaces that prioritize both comfort and functionality. With a commitment to quality craftsmanship and innovative design, we partner with airports worldwide to elevate their terminal environment. Explore our range of solutions and discover how we can shape your world-class airport interior into a reality!
